HYGIENIC DISPOSABLES FILMS

PART OF SANITARY TOWELS,
PAMPERS,
INCONTINENCE UTILITIES

PACKAGING

Rolls are protected by PE film and put on a pallet; pallets are fixed with stretch film.

ECOLOGY

Unobjectionable for environment, recyclable, films can be deposited in dumps or combusted – no harmful substances appear.

CONTACT WITH FOODSTUFFS

Unobjectionable for health, but not advised for direct contact with foodstuffs.

HYGITEN® OkV

Application

- » production of hygienic goods
- » high speed welding and packaging

Execution

- » matt surface

Width

- » 80 – 1600 mm

Thickness

- » 0,015 – 0,040 mm

Cores

- » inside diameter 76 or 152 mm

Outside Winding Diameter

- » max. 500 mm depending on width

Roll Weight

- » up to 500 kg depending on width

Surface Treatment

- » corona treatment
- » white colour

HYGITEN® OkB

Application

- » production of hygienic goods
- » high speed welding and packaging

Execution

- » matt surface

Width

- » 80 – 1600 mm

Thickness

- » 0,015 – 0,030 mm

Cores

- » inside diameter 76 or 152 mm

Outside Winding Diameter

- » max. 500 mm depending on width

Roll Weight

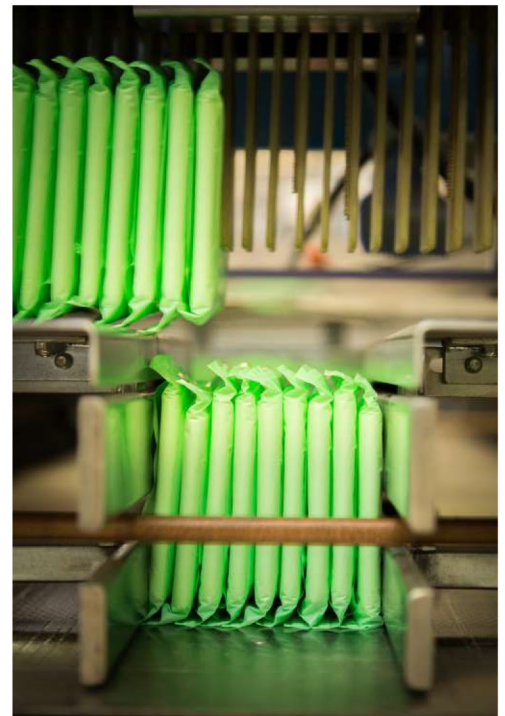

- » up to 500 kg depending on width

Surface Treatment

- » corona treatment
- » print
- » various colours

Films HYGITEN® OkV are chosen for production of sanitary towels as outside layer (BS – back sheet) and other hygienic products, such as pampers and disposal incontinence utilities. Matt surface gives an impression as a “non-plastic” product.

Films HYGITEN® OkB are specially developed as packaging films for individual packaging of sanitary towels (SW – single wrap films). The film is suitable due to outstanding properties at mechanical stress also for other sectors where high speed welding and packaging is needed.

HYGITEN®

PROPERTIES ENSURING COMPETITIVE ADVANTAGE

- » outstanding peel effect of welded packages (HYGITEN® OkB)
- » naturally matt surface
- » outstanding mechanical properties
- » unique properties of this product are protected by international patent application number 301930
